

# Smart home. Peace of mind.

Lights, heating, air conditioning and sensors in one simple app. Your home in your hand, wherever you are.

01

## Secure

No passwords. Only people you invite can get in.

02

## Fast

Open the app and your whole home is there.

03

## Reliable

Lights and heating keep working even when the internet is down.

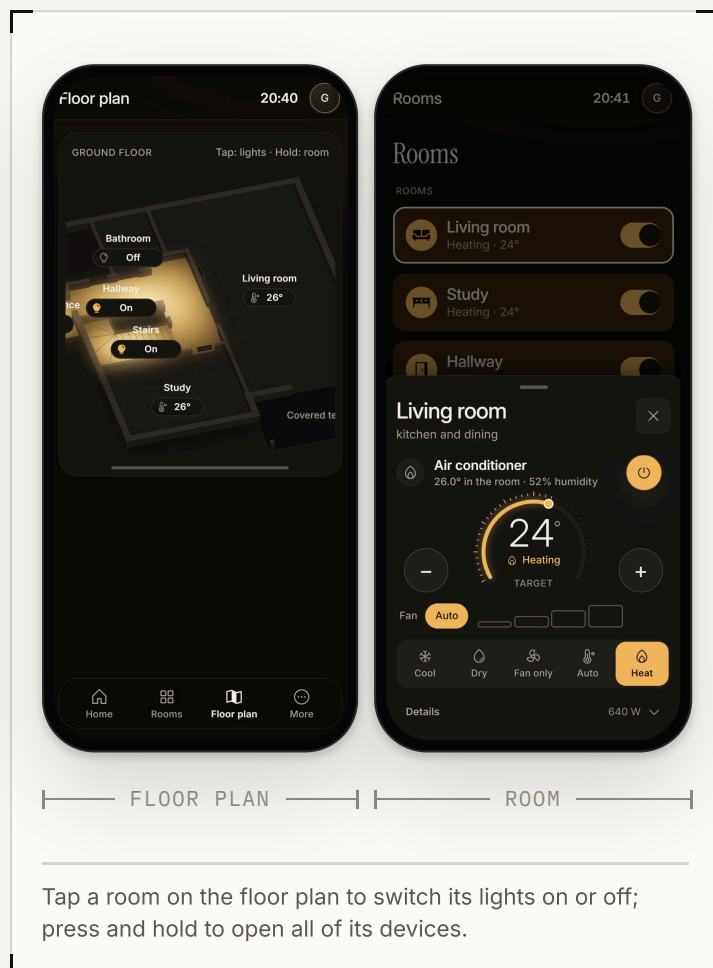

04

## Worry-free

If anything goes wrong, you'll know first.

# Your whole home, at a glance

A floor plan of your own home shows what's on and where it's warm. Tap a room to take control.

## 01 Live floor plan

Every change at home appears on the floor plan instantly: which lights are on and how warm each room is.

## 02 One tap

"Good night" switches off every light. "Leaving" turns off the lights and air conditioning as you head out.

## 03 Lights and climate, room by room

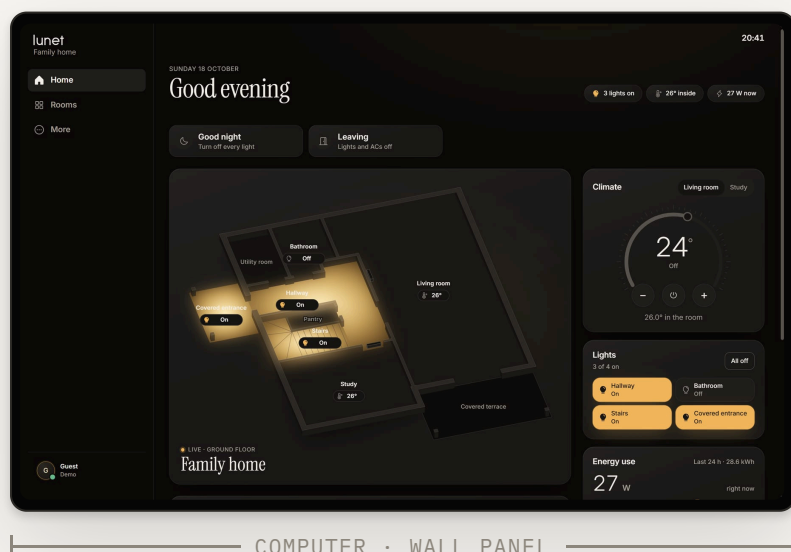

Control each room on its own, while your wall switches work just as before.

## 04 The whole household

Everyone at home has their own access. Guests control devices only, never the settings.

## One home, on every screen

On your phone, your computer or a wall panel in the hallway: the same home and the same settings, everywhere.

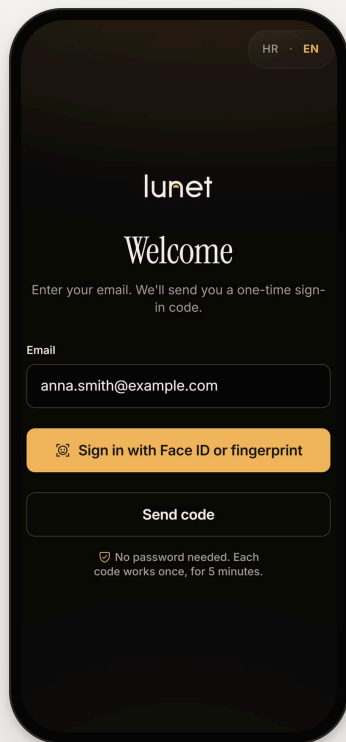

iPhone

Android

Computer

Wall panel

## Your home stays yours

### No passwords

Sign in with a one-time code by email, or with your face or fingerprint. No password to steal.

### You decide who gets in

Owner, residents and guests, each with their own rights. Remove someone and their access ends at once.

### Every home kept separate

Your home is completely separate from everyone else's, and your home network stays closed to the outside.

### Your data stays in the EU

Information about your home is stored within the European Union.

## Peace of mind, even when you're away

If there's a leak, a risk of freezing or your home goes offline, you're alerted at once, on your phone and by email.

Continuous home monitoring is part of the Care plan.

#### NOTIFICATIONS

LUNET

#### Water leak in the bathroom

now

A sensor has detected water on the floor. Please check as soon as you can.

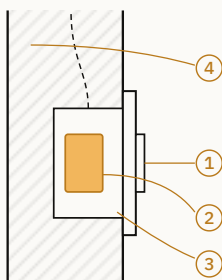

#### Your home is offline

yesterday

Check whether the power and internet are working at home.

#### B — WALL SECTION

- 1 Existing switch
- 2 Lunet module behind the switch
- 3 Existing wall box
- 4 Wall left untouched

#### FREQUENTLY ASKED QUESTIONS

## No rewiring needed

### 01 Do I need new electrical wiring?

No. Small modules fit behind your existing switches, without breaking into walls. Your switches work just as before.

### 02 How is Lunet different from KNX?

It offers similar comfort, without new wiring and at a fraction of the cost. It can even be fitted in a home you already live in.

### 03 Can I keep the devices I already have?

Yes. We bring your existing air conditioners, thermostats and sensors together in one app.

# Choose the plan that suits your home

Every plan includes the app for the whole household, on all your devices.
