

Smart home. *Peace of mind.*

Lights, heating, air conditioning and sensors in one simple app. No rewiring, right in the home you already live in.

Secure

No passwords. Only the people you allow can get in.

Fast

Open the app and your whole home is right there.

Reliable

Lights and heating keep working when the internet is down.

Worry-free

If something isn't right, you'll be the first to know.

Your whole home, *on one screen.*

See what's happening on your home's floor plan. Tap a room to take control.

01 Live floor plan

See at a glance which lights are on and how warm each room is.

02 One tap

"Good night" turns off every light. "Leaving" turns off the lights and air conditioning.

03 Room by room

Lights and climate for every room. Wall switches work as before.

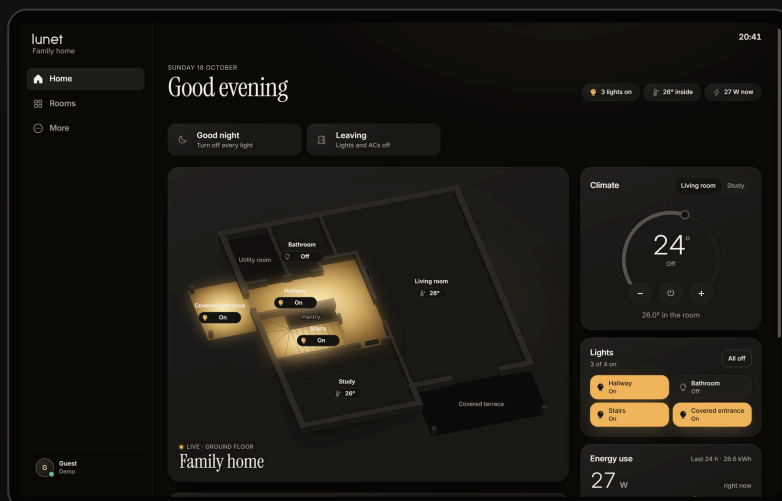

04 The whole household

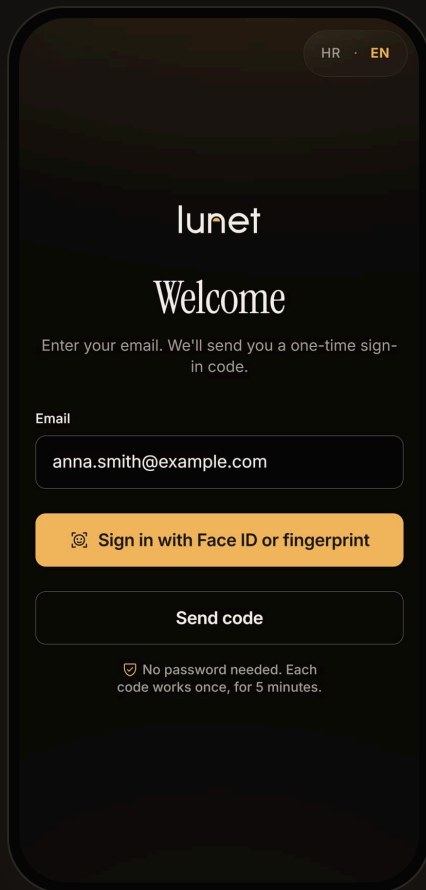

Residents get full everyday control, guests just the devices. Each with their own access.

One home, *on every screen.*

On your phone, your computer or a panel in the hallway. The same look everywhere, always in sync.

- iPhone
- Android
- Computer
- Wall panel

SECURITY

Your home, *only yours.*

Passwordless sign-in

A one-time code by email, or your face or fingerprint. No password to steal.

Every home separate

Your home is fully separate from all others.

You decide who gets in

Invite your household and guests. Remove someone's access and it ends instantly.

Your data stays in the EU

Your home network stays closed to the outside, and your data stays in the EU.

ALERTS

Calm, even *when you're away.*

A water leak, a risk of freezing or a lost connection: you're alerted straight away, on your phone and by email.

LUNET

now

Water leak in the bathroom

Water detected by the washing machine.

LUNET

1 hour ago

Risk of freezing

The holiday home is close to freezing.

LUNET

yesterday

Your home is offline

Check the power or internet at home.

COMMON QUESTIONS

No new *wiring.*

Do I need new electrical wiring?

No. Small modules fit behind your existing switches, without breaking into walls. The switches work just as before.

How is Lunet different from KNX?

Similar comfort, but without new wiring and at a fraction of the price. It can be fitted in a home you already live in.

Can I keep the devices I already have?

Yes. We bring your existing air conditioners, thermostats and sensors together in one app.

A plan to *suit* *your home.*

Every plan puts your whole home in the app. Care adds monitoring and support; Rental adds what hosts need.

	For every home	RECOMMENDED Peace of mind	For hosts
	Lite	Care	Rental
	For families who want it all in one place.	For holiday homes and frequent travellers.	For apartments and holiday lets.
WHAT'S INCLUDED
